1.0 Kentucky New Energy Ventures Fund Overview

A. Program Overview

The Kentucky New Energy Ventures Fund (KNEV) supports the development and commercialization of alternative fuel and renewable energy products, processes, and services in Kentucky. The purpose of KNEV is to:

- (a) Accelerate knowledge transfer and technological innovation, improve economic competitiveness, and spur economic growth of Kentucky-based companies involved in the areas of alternative fuels or renewable energy;
- (b) Support research and development activities that have clear potential to lead to commercially successful products, processes, or services in the areas of alternative fuels or renewable energy within a reasonable period of time;
- (c) Stimulate growth-oriented alternative fuel and renewable energy enterprises within the Commonwealth;
- (d) Encourage partnerships and collaborative projects between private enterprises, Kentucky's universities, and research organizations in alternative fuels and renewable energy; and
- (e) Promote research and development and commercialization activities in alternative fuels and renewable energy that are market-oriented.
- (f) Support research and development and commercialization activities in the areas of aerospace/aviation, exomedicine and related activities.

In addition, the Cabinet for Economic Development's (CED) Office of Entrepreneurship (OOE) and the Kentucky Science and Technology Corporation's (KSTC) goals for KNEV are to grow alternative fuel and renewable energy companies in Kentucky, to stimulate private investment in these companies, establish an alternative fuel and renewable energy industrial knowledge base in Kentucky, and to develop a support network for individuals and companies operating in this industry.

KNEV supports companies developing and commercializing products in the following areas:

- Alternative transportation fuels produced from coal, waste coal, or biomass or extract oil from oil shale to power vehicles, aircraft, and machinery;
- Synthetic natural gas produced from coal through gasification processes;
- Biodiesel;
- Ethanol produced from food crops or cellulosic ethanol;
- Any other fuel that is produced from a renewable or sustainable source; and
- Aerospace, aviation and exomedicine.

Applicants must be able to demonstrate their ability to develop and lead a commercially successful venture. Companies seeking capital go through a rigorous due diligence process and are judged in terms of industry fit, return on investment and economic development goals. KNEV provides financial support to companies through grants and investments.

To be eligible, an applicant must be a Kentucky-based company. "Kentucky-based" means a business with its principal place of business in Kentucky or at least fifty-one percent (51%) of its property and payroll located in Kentucky. For the purposes of grants, a "Company" means any corporation, limited liability company, partnership, limited partnership, sole proprietorship, business trust, person, group, city, county, charter county, consolidated local government, urban-county government, or unified local government entity, or other entity engaged in research and development and commercialization related to, or the production of, alternative fuels or renewable energy. For the purposes of investments, a "Company" means any C-type corporation or limited liability company.

Through a contractual arrangement with the Office of Entrepreneurship (OOE), KSTC administers the KNEV Program in the manner set forth in the Guidelines for the KNEV Program as approved by OOE. CED provides funding to KNEV.

KNEV provides financing to support Kentucky's alternative fuel and renewable energy development companies. The funds may be used to support operations, which may include development of a business plan, market strategy, or commercialization strategy; filing for intellectual property protection; development of a prototype; proof of concept work or product testing; commercial development work; product launch; business expansion; and other operational work that supports the development and/or commercialization of the company's product(s) and increases the valuation of the company.

By statute, KSTC, the science and technology organization on contract with CED/OOE, accepts, reviews, and makes funding decisions on applications at least twice per year. KSTC will monitor, manage, and report on the grants and investments made during the agreement period.

B. Applications for the Kentucky New Energy Ventures Program

KNEV is a highly competitive program that provides financial support to companies developing alternative fuel and renewable energy technology products. KNEV accepts application for grants and investments. For both grant and investment applications, applicant companies must be Kentucky-based, focused on commercializing a product, process, or service in the alternative fuel or renewable energy market, and provide matching funds to the funds provided by KNEV. All applicants are reviewed on the basis of the management team, technology and technology development strategy, market, intellectual property, sales and marketing strategy, manufacturing strategy, regulatory strategy, and the business model. In addition to KSTC's internal review processes, KSTC employs external,

expert technical reviewers to assess a company's technology, its technology development strategy, and feasibility.

In order for a company to be eligible for a grant, the company may be organized as any corporation, limited liability company, partnership, limited partnership, sole proprietorship, business, person, group, city, county, charter county, consolidated local government, urban-county government, or unified local government entity, or other entity engaged in research and development and commercialization related to, or the production of, alternative fuels or renewable energy. Additionally, the company must provide matching funding to the KNEV funds, either in cash or in kind (must be approved by KSTC), on a one-to-one (1:1) dollar ratio. If a company receives a grant and then receives an investment from KNEV, KSTC requires the grant funding to be treated like an investment and will incur the same payback provisions required of investment funding.

In order for a company to be eligible for an investment, a company must be organized as a C Corporation (C-corp) or as a limited liability company.

C. Application Review and Funding Decisions for the Kentucky New Energy Ventures Program

KSTC processes and analyzes KNEV applications according to the OOE-approved review process. Funding decisions are made on the basis of the results of the due diligence on each application.

KNEV proposals are analyzed on the following minimum terms:

- Receipt and documentation of application.
- Review of the application for eligibility criteria.
- Technical and business review, including the use of external technical reviewers

Applications are screened for eligibility based on the criteria outlined in the KNEV guidelines, approved by OOE. Minimum eligibility criteria include:

- Kentucky-based company status (defined in the statute as “a business with its principal place of business in Kentucky or no less than fifty-one percent, 51%, each of its property and payroll located in Kentucky”).
- The company is working in a market/industry that is eligible for KNEV.
- Verification that the company will be organized in a form in accordance with the KNEV guidelines before any award funding (if awarded) is disbursed.

After the applications are determined to be eligible, they are reviewed. Specifically, KNEV examines the technical aspects of the proposal; the company's target market; the management; the operating strategy; the financing strategy; the intellectual property

strategy; the business model; and the company's sales, marketing, manufacturing and regulatory strategies to determine if the company is performing work that will:

- Produce a measurable result and is technically sound
- Lead to an innovative technology or new knowledge
- Lead to commercially successful products, processes, or services within a reasonable period of time; or
- Show significant potential for stimulating innovation-driven economic growth and a reasonable probability to enhance employment opportunities within the Commonwealth.

The applications are also reviewed to compare the proposed deliverables with the proposed use of proceeds to ensure that the proposed work can be carried out and its goals achieved with the funding.

D. Award Selection, Funding Disbursements, and Reporting

The award selection process reflects the underlying purpose of the KNEV program as defined by the OOE and the KNEV goals. When reviewing proposals, KSTC factors in the “dual bottom line” that KNEV carries. While direct return on investment is an important outcome of KNEV, there is an equally compelling economic development objective, which is to encourage the development of new technologies to advance the public purposes of achieving energy independence, creating new jobs and new investment, and creating new sources of tax revenues for the Commonwealth of Kentucky.

Prior to receiving funding, Awardees enter into a funding agreement with KSTC (a grant award agreement for grantees or the funding documents associated with the investment round for an investment) on behalf of CED/OOE. After execution of the funding agreement, KSTC submits an invoice and a copy of the executed funding agreement to OOE. OOE will issue the funding to KSTC, which will then disburse the funding according to the requirements in the funding agreement.

Funded companies are required to submit regular progress and financial reports to KSTC.

2.0 Performance Summary

A. FY2018 Summary

Following the execution of a contract between the Commonwealth of Kentucky, CED/OOE, and the Kentucky Science and Technology Corporation (KSTC), work on KNEV (legislatively the Kentucky Alternative Fuel and Renewable Energy Fund Program) formally began on February 1, 2008 with the contract extended on July 1, 2008, July 1, 2010, July 1, 2012, July 1,

2014 and July 1, 2016. During the performance period (July 1, 2017 – June 30, 2018), the activities included: none.

During FY2018, KNEV received and made funding decisions on no applications from Kentucky-based companies (total requested funding \$0).

B. KNEV Summary Since Inception

Since 2008, 24 KNEV grants (\$1,290,000 total committed) and eight investments (\$2.81MM total committed) have been awarded. Six grant awards have been terminated – one grant award recipient withdrew as it could not reach an agreement with its partner organization to begin the work on the award, one grant funding agreement was terminated after execution due to irregularities in the Company’s financial reports, three grant awards stopped work after executing the funding agreement, and one grant award did not maintain its status as a Kentucky-based company. One investment award was withdrawn as the Company was unable to meet KNEV’s matching funds requirement. As of June 30, 2018, KNEV has awarded \$4.1MM, has received \$3,667,700 for awards from OOE and has disbursed a total of \$3,264,200 to awardee companies. KNEV Fund remaining balance for future awards and administration, as of June 30, 2018, is \$81,351.

3.0 Ten Year Impact of Kentucky New Energy Ventures Fund Program

Over the first ten years of KNEV’s operations (February 2008 through June 2018), CED/OOE has achieved its goals by funding promising, high-growth potential energy startup companies in Kentucky. While CED/OOE has committed \$4.1MM in KNEV funds for investment into Kentucky-based high-tech energy companies (through both investments and grants), private investors have invested over \$26.8MM into these companies (both cash and in-kind). Every award dollar committed by KNEV to a Kentucky-based company has resulted in seven dollars in private funding committed to the awarded companies. The private investment has come from the entrepreneurs, angel investors, venture capital funds, strategic investors, and banks. The amount of private investment is expected to grow substantially over the next year as several KNEV investment awardees are raising substantial financing rounds to complete product development to enter their target markets.

Additionally, KNEV has encouraged and supported collaborations between the state’s universities and private companies. KNEV awardees actively work with the University of Kentucky Center for Applied Energy Research, College of Agriculture, and College of Engineering, with the University of Louisville Speed School of Engineering and the Conn Center for Renewable Energy Research.

Grantees have used the funding to evaluate new energy technologies, to develop improved components for energy systems, to evaluate the economics of energy related technologies, and to develop prototype energy systems. The awardees that have successfully completed their work continue to develop their products, their business models, and to seek additional funding. One grant awardee, Commonwealth Biofuels, was awarded a KNEV investment after the successful completion of its grant.

KNEV investments are focused on completing the development of proprietary products, developing their first projects, and entering the market. Additional details are below.

4.0 Performance Services

A. *Promoting the Program across Kentucky and the United States*

Working with CED/OOE, KSTC, *in prior years (FY08-FY17)*, promoted the KNEV Program across the state by promoting the Program to the Kentucky Innovation Network, potential clients, attending industry-specific meetings across the state, by working through KSTC and alternative energy contacts, and by promoting the Program on the CED/OOE and KSTC websites. Additionally, KSTC met with many potential applicants to discuss the Program's benefits and requirements.

B. *Review of Applications*

KSTC received no grant application and awarded \$0.

C. *Portfolio Support*

N/A.

5.0 Summary of Applications, Awards, and Companies

To date, KNEV has accepted a total of 95 applications requesting a total of \$21.62MM and has awarded a total of \$4.1MM (see Table 1, p. 12, for additional information). KNEV's investments have stimulated over \$26.8MM of private investments into KNEV awardees.

Figure 1 Number of KNEV Applications by Fiscal Year

Figure 2 KNEV Applications by County

Figure 3 Award Funding by County

Figure 4 Number of Awards by County

Figure 5 Awards by Industry

Table 1 presents a summary of the 31 KNEV awards (eight investments, 23 grants). A brief company description is provided for select awarded companies following the table.

Table 1 Cumulative Summary of KNEV’s Awards

Company Name	Technology Focus	County	Grant/ Investment	Awarded Funds	Status
Wind Energy Corporation	Wind	Hardin	Investment	\$750,000	Inactive

Louisville Clean Energy	Biofuels	Jefferson	Investment	\$250,000	Closed
Neathery Technologies	Biofuels	Fayette	Grant	\$30,000	Completed
Kentucky Renewable Energy	Biofuels	McCracken	Grant	\$30,000	Completed

ecoPower Generation, LLC	Biofuels	Perry	Investment	\$250,000	Active
Commonwealth Biofuels	Biofuels	Garrard	Investment	\$60,000	Inactive
RCC Big Shoal	Alternative Energy	Pike	Investment	\$250,000	Active
Recycling Solutions Technology	Alternative Energy	Martin	Grant	\$30,000	Completed
Catalyst RNG (Domestic Biosolutions)	Alternative Energy	Fayette	Grant	\$30,000	Award Withdrawn
Exomedicine Institute	Aerospace/Exomedicine	Fayette	Grant	\$600,000	Active

6.0 Outlook

In the past year, applications to KNEV declined and portfolio companies have continued to struggle to raise the funding necessary to move their projects forward. Technology, regulatory, and financing risks continue to be the main factors limiting the companies' progress. As a result, KNEV has seen the number of entrepreneurs willing to start a company in this sector fall substantially, and the companies that are started tend to not have founders or management with any energy development experience. From our experience, management/founders with a background in the energy sector is one of the largest determinants of success and, without this background, companies tend to have a much higher chance of failure.

7.0 Financial Update

For the fund, \$5,000,000 was made available to KNEV for grants, investments, and administrative costs. The total award funding from inception (February 1, 2008) through June 30, 2018 is \$4.1MM. Through June 30, 2018 KSTC has signed award agreements with 30

of the 32 awardees. The two awards that have not been executed have been withdrawn and no longer represent active commitments from KNEV (total funding \$280,000). After award forfeitures and unused awardee balances are taken into account, \$3,264,200 has been disbursed to KNEV awardees and \$1,269,503 has been used to manage the fund, leaving a balance of \$81,351 in the fund. Please see Attachment 2 for additional details.

8.0 Reporting Requirements

KNEV monitors all active grants.

9.0 Program Staff

Shari Ball – Administrative Assistant

Shari joined KSTC in March 2007 as Administrative Assistant for the Kentucky Enterprise Fund. Prior to joining KSTC, Shari provided administrative support to the University of Kentucky's Division of Pulmonary/Critical Care and Sleep Medicine. Shari also has experience working with various educational organizations in North Carolina, Tennessee, and Texas. Shari earned degrees in Business Management and Fashion Merchandising from Indian River Community College in Ft. Pierce, Florida.

Steve Pelphrey – Controller

Steve joined KSTC in April of 2017 as Controller and is responsible for all internal/external financial analysis and reporting, contract compliance/revenue recognition across diverse federal, state and private funding sources, cash management/banking relationships, coordination of annual independent audit process and other periodic governmental audits and regulatory compliance. A Kentucky native, Steve has extensive financial leadership experience with both for-profit and non-profit organizations including YMCA of Central Kentucky, ATMA Investments, Keeneland Association, Lexmark International and Kentucky Housing Corporation. Steve holds a BS in Accounting from the University of Kentucky and an MBA in Finance from Xavier University. He is also a Certified Public Accountant and a Certified Internal Auditor.

Kelby Price – Fund Director

Kelby joined KSTC from Chrysalis Ventures in November 2014. Kelby successfully co-founded, grew and exited (2) technology companies and has been very active in Louisville's startup community, serving as an advisor/volunteer to regional accelerator programs, many individual startups & entrepreneurs, organizing Startup Louisville, the Louisville Startup Weekend, Louisville Maker Faire, and many other activities.

Attachment 1 – KNEV Overview

Kentucky New Energy Ventures Fund

Overview The Kentucky New Energy Venture Fund (KNEV) supports the development and commercialization of alternative fuel and renewable energy products, processes, and services in Kentucky. The goals of KNEV are to grow alternative fuel and renewable energy companies in Kentucky, to stimulate private investment in these companies, establish an alternative fuel and renewable energy industrial knowledge base in Kentucky, and to develop a support network for individuals and companies operating in this industry.

KNEV will provide support to companies developing and commercializing products in the following areas:

- Alternative transportation fuels produced from coal, waste coal, or biomass or extract oil from oil shale to power vehicles, aircraft, and machinery,
- Synthetic natural gas produced from coal through gasification processes
- Biodiesel
- Ethanol produced from food crops or cellulosic ethanol
- Any other fuel that is produced from a renewable or sustainable source
- Aerospace, aviation and exomedicine

Applicants must be able to demonstrate their ability to develop and lead a commercially successful venture. Companies seeking capital go through a rigorous due diligence process and are judged in terms of industry fit, return on investment and economic development goals.

Who Can Apply Kentucky-based companies who are "Active" and "Good Standing" with the Kentucky Secretary of State.

Companies must have a unique and competitive product, technology, or process that can be protected in the commercial marketplace.

Applicants must demonstrate the commercial viability of their technology and must demonstrate their ability to develop and lead a commercially successful venture.

Investments can only be made in a company organized as a C Corp.

or as an LLC.

Award Amounts KNEV will provide grants and investments. Funds are to be used to support the operations of the company that advance the development and commercialization of the company's product and that increase the valuation of the company.

Funds may NOT be used for real estate development projects.

The company must complete all milestones and be good standing to continue to receive funding.

Matching Requirement Companies must match the fund's investment on a one-to-one (1:1) dollar ratio. Grantees can match KNEV's funding in cash or in-kind sources (at KSTC's discretion). Investees must match KNEV funding in cash through either a stand-alone investment or through a qualified financing.

In order for funds to be considered matching for KNEV, the matching financing must be closed no more than six months before the application or within six months after an investment notice.

Matching funds cannot be comprised of funds from KSTC or the Commonwealth of Kentucky.

Ownership of Technology KSTC does not take ownership of the technology; the company retains ownership.

If the company does not own the technology used in the project, the applicant must provide documentation stating its right to utilize or further develop that technology prior to receiving any award.

Return on Investment There are no payback requirements for grants. However, the award may become subject to payback as a condition of future awards as mentioned below.

KNEV investments must be matched 1:1 in cash. Investments are invested via a standalone convertible note or as part of a qualified round of financing. If matching funds are provided by the company or "friends and family", the investment will be via a convertible

note. If matching funds are provided by independent investors, then KNEV will invest according to the terms of the round.

If the company applies for and receives KNEV funding beyond the grant, KSTC will negotiate a payback provision for the full amount of all awards made.

Attachment 2 – KNEV Financials

KENTUCKY SCIENCE & TECHNOLOGY CORPORATION
